Single channel output LED driver power supply

HZD020CFX series

合智电子 HILZEALED

Features

- Constant current design, support DALI and Push dimming
- Wide input voltage range, high power factor
- Small and compact Size
- Protections:over-voltage/short circuit /overload
- No load power consumption<0.5W@220Vac
- Dimming depth 5%-100%
- Low cost,high reliability,isolated design
- •5 years warranty

Applications

Suitable for external power supply of lamps within 20W

Specifications and models

	MODEL	HZD020CFX		
OUTPUT	DC VOLTAGE	18-36V	36-42V	
	RATED CURRENT	450MA	400MA	
	FLOATING VOLTAGE	48V	48V	
	ACCURACY OF CURRENT	±5%		
	HOLD UP TIME	500ms&220Vac at full load		
	VOLTAGE RANGE &FREQUENCY RANGE	90-265Vac 50-60Hz		
INPUT	POWER FACTOR	>0.9&220Vac		
	EFFICIENCY&220Vac	86%	86%	
ENVIRONMENT	WORKING TEMP AND HUMIDITY	-25~+60℃ 0~40% RH		
	STORAGE TEMP ANG HUMIDITY	-40~+80°C 10~60% RH		
	SAFETY STANDARDS	EN61347-2-13:2014+A1:2017;EN61347-1:2015+ A1:2021; EN IEC60598-1:2021; EN62493:2015		
SAFETY&EMC	EMC STANDARDS	EN IEC 55015:2019+A11:2020 ; EN IEC61000-3-2:2019;EN 61000-3-3:2013+A1:2019 EN61547:2009		
OTHERS	DIMENSION	100*43*21mm (L*W*H)		
	PACKING	73g

Dimming operation

%Press dimming (primary side)

serial number	Function	Operation	Explain
1	The electric memory	power on	When the LED driver is powered on, it will restore the memory before the LED driver is powered off If the LED driver is turned off before power off, then power on it After the lamp is still turned off, if the LED driver is powered off before 50% brightness, Automatically restores to 50% brightness (after power-on Degree memory after the last dimming stability of the brightness, the brightness of the dimming process Do not do memory), after powering on the first long dimming direction for dimming.
			If the light is originally on, the light will be off after

Sing	Single channel output LED driver power supply HZD020CFX series				
	Turn on / Off	Short press	a short press; If the lamp is off originally, the light wil		
2	lights	50ms-600 ms	turn on after a short press, and the illuminance at this tim		
			is the illumination before turning off the lam		
			(illumination memory function).		
			Hold down the reset switch for a long time, and the lamp wil		
			enter the dimming state. If it was dimming for the previou		
			time, it will automatically turn to dimming for the nex		
3	Dimming	Long press 1 s	time. After releasing the reset button, the dimming will sto		
		to 3 s	and maintain the current illumination.Dimming rang		
			5%-100%. The default value is On for the first power-o		
			duration. If the power-on brightness is the maximum, th		
			value is dimmed for the first duration.		
			If all the lights connected to the same SwitchDIM system ar		
4	Synchronize	Long press 10 s	switched on or their brightness is inconsistent, hold dow		
	all lights		for 10s to turn all the lights on with the same brightnes		
			(50%), and hold down the next time to dim the dimmin		
			direction.		
			The gradient time affects the dimming speed, and the smalle		
			the gradient time, the faster the dimming speed. The defaul		
5	Change the	Long press 20 s	dimming gradient time is 3s. When you hold down for 20s		
	gradient time		change the dimming gradient time to 6s, and output 100		
			brightness (when you hold down for 10s, all lights will b		
			synchronized and turn on 50%). When the send button is presse		
			again for 20s, the gradient time is changed to 3S;If you d		
			not release the button, keep the brightness at 100%.		
6	Reset to	Long press 10 s	Press for 10s four times, with an interval of no more that		
	factory	Four times	2s.Restore the gradient time, switch state, brightness		
	Settingsbuy		control mode, etc., to factory Settings.		

※DALI interface (primary side)

- DALI signal is applied between DA+ and DA-.
- DALI signals support IEC62386-102 protocol instructions.
- The first step is to fix it at 5% of output.
